

AC3300-6k

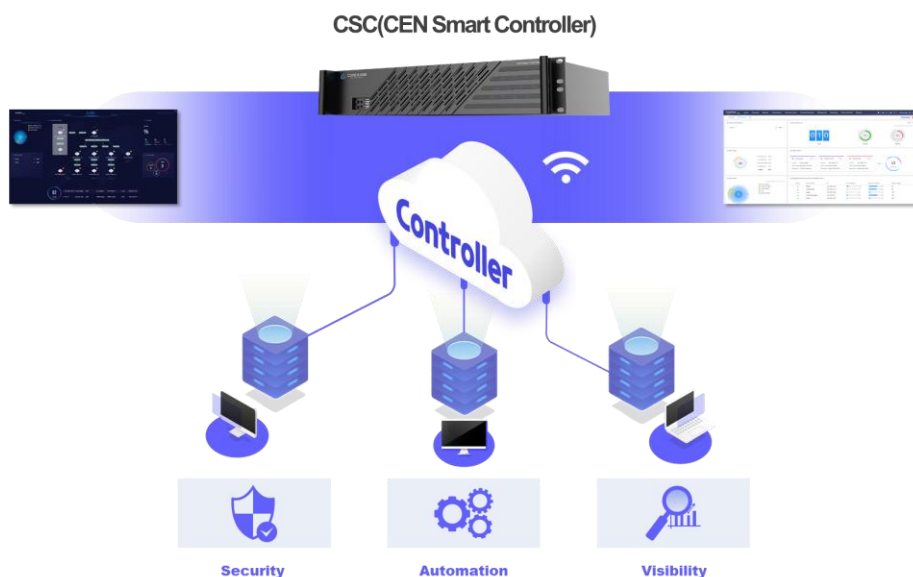

Specification

Hardware	Description	
Performance	• Switching Capacity: 608 Gbps	
Interface	• 24 port 10/100/1000 Base-T	• 8 port 1G/10G
	• 8 port 10G/25G	
Memory	• DRAM 16 GB	• Flash 4 GB
FAN	• Dual Fixed FAN	
Management	• 1-port RJ-45 Console	• 1-port USB
	• 1-port Mgmt Interface	
Power Supply	• Dual power supplies	• Modular power supply with hot-swappable (AC/DC)
	• Power Consumption: 86W	• Heat Dissipation: 293.4 BTU/h
Environment	• Operating Temperature: 0~50°C	• Operating Humidity: 10~90% (Non-condensing)
Dimension	• 440(W) x 420(D) x 44(H) mm	• 1 RU
Software	Description	
Forwarding	• Centralized forwarding	• Local forwarding
AP Capacity	• Default: 128 AP	• Maximum: 6,656 AP
Maximum Stations	• 40K (Centralized forwarding)	• 80K (Local forwarding)
802.11 Standard	• IEEE 802.11a/b/g/n/ac/ax	
Roaming	• Seamless L2 & L3 Roaming	• 802.11k/v Fast Roaming
	• PMK Caching	
SDN	• Netconf	
Wireless QoS	• Wi-Fi Multimedia	• Wireless Multicast Forwarding
	• AP Bandwidth limitation	• BSS total bandwidth limitation
	• BSS user bandwidth limitation	
RF Management	• RRM – Radio Resource Management	• Channel Selection: Manual, Automatic (ACS)
	• Transmit Power Control: Manual, Automatic(TPC)	

Software	Description	
Authentication Methods	• Open	• WPA/WPA2/WPA3-PSK
	• WPA/WPA2/WPA3-802.1X	• LDAP
	• Portal URL Redirection	• Portal Server Escape
	• Captive Portal Authentication(External Portal, Local Portal, MAC Authentication, No-perception Authentication)	
Wireless Security	• WIDS and WIPS	• User isolation
	• SSID hidden	• Anti-rogue
	• Wireless Access Control	• Service Status Control
L2 protocol	• VLAN	• STP/RSTP/MSTP
	• PVSTP+ Compatible protocol	• Link Aggregation
L3 protocol	• IPv4/v6 Static routing	• RIP/RIPng
	• OSPF/OSPFv3	• VRRP/VRRPv3
	• PBR(Policy-based Routing)	• Gateway Keepalive
Reliability	• HAP (Hybrid Access Point, AP Escape)	• Uplink Detection
	• Configuration Synchronization	
HA support	• 1+1 Active-Active	• 1+1 Active-Standby
Advanced Features	• RF Detection	• Packet Air Capture
	• Telnet / SSH / HTTP / HTTPS	• Console / Mgmt Interface
Management Features	• Syslog, NTP, SNMPv1/2c/3	• DHCP Server
	• Can be managed for Wired and Wireless Networks in CSC *	
Certification	• KC EMC – Electromagnetic Compatibility	

* CoreEdge Smart Controller required.

Key Features	Benefits
Zero-Configuration Plug-and-Play	In Fit AP mode, APs automatically discover and connect to the wireless controller over Layer 2 or Layer 3 networks. The AC3300-6K wireless controller manages the configuration and operation of connected Fit APs and efficiently monitors them across L2/L3 networks.
High Availability	The AC3300-6K ensures stable network services with its High Availability (HA) capability. It supports Active-Active or Active-Standby redundancy configurations to maintain continuous connectivity and enhance network reliability.
RF Optimization	Intelligently manages bandwidth and proactively disconnects clients with weak signals to optimize wireless network performance. Also converts multicast traffic to unicast for more efficient traffic management.
Seamless Roaming	Supports L2 & L3 roaming and 802.11k/v roaming to enhance user mobility within the network. Users can move across the wireless network without experiencing connection drops, ensuring uninterrupted service.
Unified Wired & Wireless Features	The AC3300-6K wireless controller supports a wide range of L2 and L3 functionalities. With high-capacity switching interfaces, it not only manages connections for numerous wireless APs and terminals but also supports data switching in wired networks.
Comprehensive Security Policy	Provides multiple authentication modes, access control, and built-in WIDS to detect and block potential threats. Also supports strict user access control policies, including PSK authentication, 802.1x authentication, MAC authentication, and portal authentication.
Large-Scale AP Management Performance	Capable of managing up to 6,656 APs, making it ideal for large-scale wireless deployments in schools, government agencies, and enterprises.
Intelligent Management	Offers advanced smart management features, including automatic software upgrades, configuration delivery, SNMP, and Netconf. These capabilities significantly reduce AP deployment costs and the complexity of network maintenance.
